> Have you noticed that this document looks like a Github README? That's because it is! You can find out more about how I built it here

Skills

I'm a passionate coder with a strong interest in user experience and accessibility. Here are a few technologies I have worked with:

[AWS] [CSS3] [Debian] [Docker] [Firebase] [Git] [Github] [Gitlab] [GraphQL] [HTML5]
[Next.js] [Node.js] [OpenAI] [React.js] [Ruby on Rails] [Sanity] [Shopify] [TailwindCSS]
[Three.js] [TypeScript] [Vercel] [Vite] [Wordpress] [tRPC]

Experience

Assist Digital (2023 - Present)

I work in the Advanced AI team at Assist Digital. My job involves working with cross-functional teams to design and develop user interfaces. My stack includes React, TypeScript, TailwindCSS, Tanstack Query, Gitlab, Vite.

La Colonia (2019 - 2023)

I worked as a frontend developer on a wide range of projects. From marketing webistes to E-Commerce and interactive web applications. During my time at La Colonia I helped the company to optimize the development process by introducing new tools and deployment strategies. Here are a few examples of projects I worked on:

- https://akfc66.gr
- https://andreacaputo.com
- https://blackmed.invernomuto.info
- https://karlaotto.com
- https://veneziafc.it

Freelance (2022 - Present)

I have worked on a few projects as a freelance developer. Here are a few examples:

- https://eneatoldo.com
- https://eneatoldo.studio
- https://lacortedeimiracoli.it

Education

In april 2020 I have graduated from the Milan Conservatory with a Bachelor degree in Electronic Music. As part of my thesis I created a web application to play music with friends over the internet using Electron and SuperCollider. The project can be found here

Blog posts

I like to write about the things I learn. Here are a few examples:

- Custom OTP inputs are dumb. Here is how to build one.
- OAuth2 and AWS Cognito for Browser Extensions
- Using OpenAI to control an Ableton Live Session 🎼
- How to setup a Node for Max project with TypeScript
- ChatGPT clone with React Suspense and Streaming
- Better LLM Chatbots with React Suspense 🌀
- I Published my CV on NPM
- How to make a ChatBot using HTTP streaming with LangChain and Express
- The best way to fetch data from Sanity (using zod)
- Consuming Web Streams with useState, SWR and React Query
- Taming the HTML dialog with React and TailwindCSS
- Consuming Web Streams with useState, SWR and React Query
- SEO friendly infinite scroll for Shopify themes
